# Activity Finder Filters

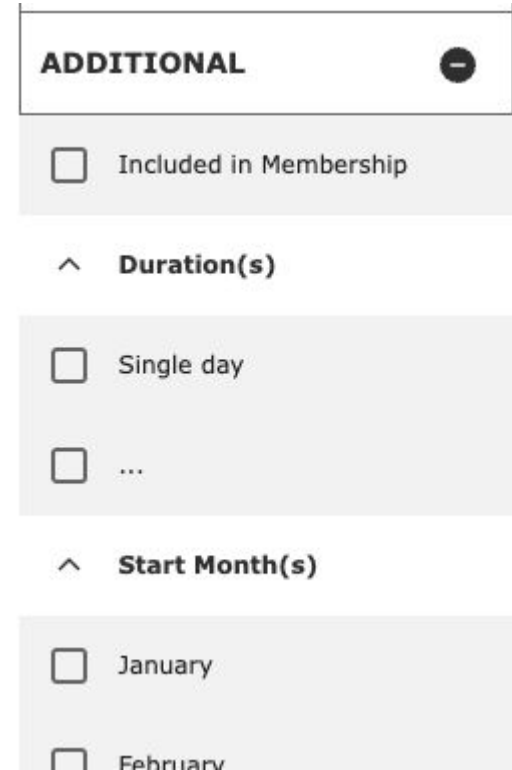

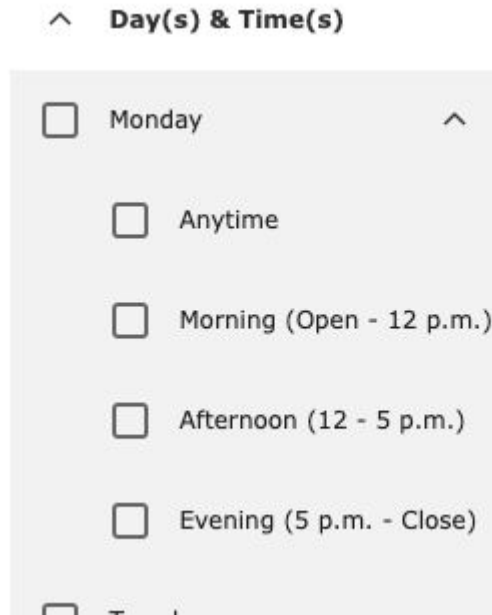

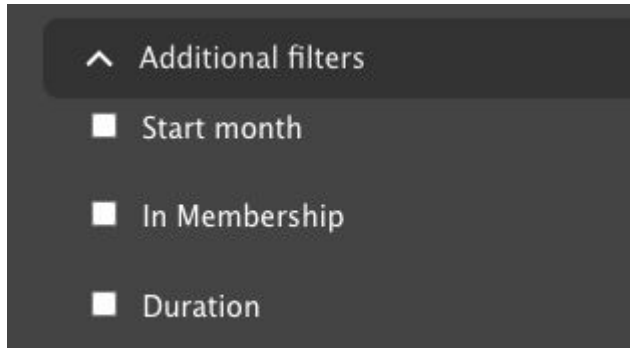

## Updated filters for Activity Finder

Expanding on Activity Finder filtering options to allow for users to more easily sort and filter activities based on specific criteria.

New filters include:

- Time of Day
- Start Month
- Duration
- Included in Membership

# Next Generation Design System

# Next Generation Design System

Why are we doing this?

-  Provide more consistency and reusability in our components.
-  Allow the reuse of components outside of the Carnation theme.
-  Adaptation of components to additional “color modes” (for instance “Dark Mode”, “High-contrast (AAA) Mode”)
-  Clarify the processes of extending and overriding components.

# Next Generation Design System

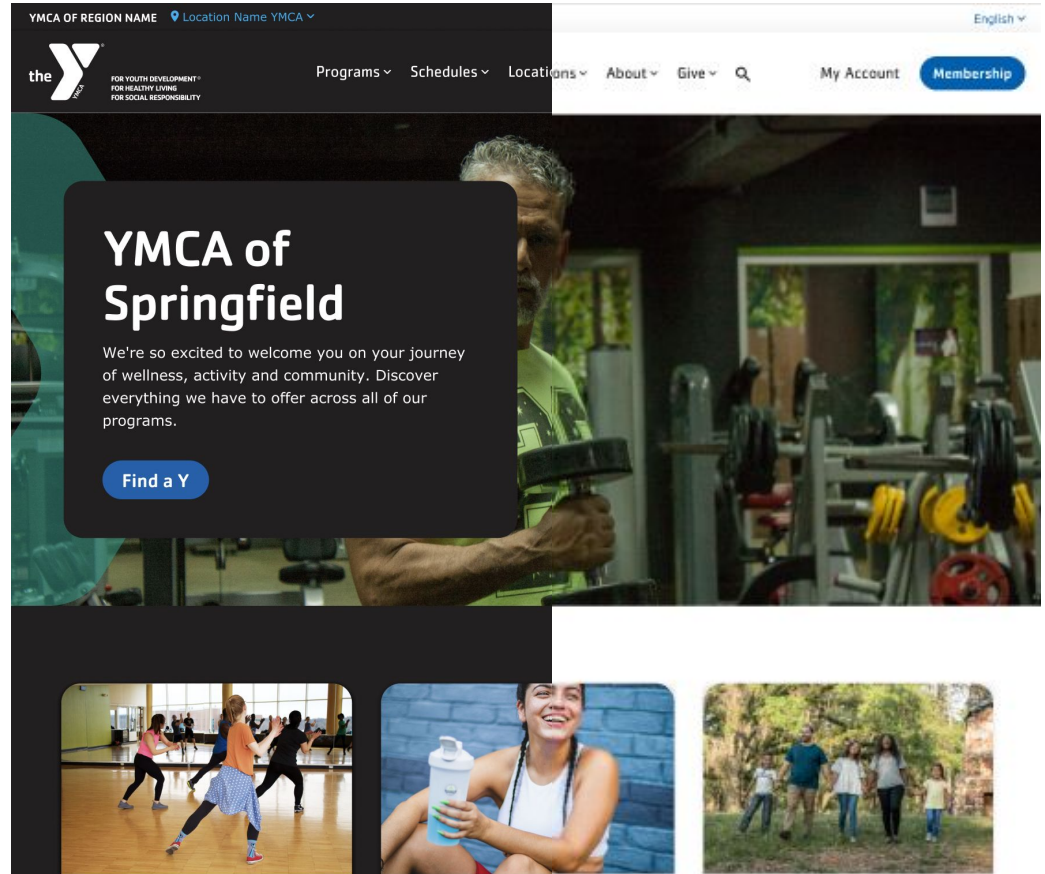

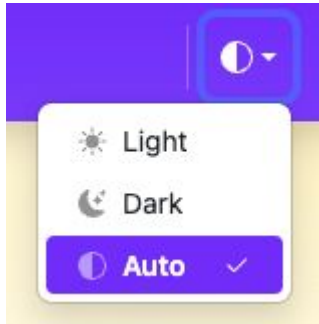

What is the benefit to my Y?

-  Dark mode can reduce eye strain, which can result in increased engagement and higher conversion rates!
-  Adding color modes can benefit users with visual impairments or sensitivity to bright light.
-  A majority of users (60-80%) prefer dark mode and choose it on their mobile devices.

Additional, accessible, brand-compliant color options will help your Y stand out in a competitive market.

# “Dark Mode” for the Design System

**Dark mode** is a feature that changes the color scheme of an application or device interface from the traditional light background to a darker one.

# Product Roadmap Portal

# Don't forget about YUSA's Product Roadmap Portal!!

## Future Roadmap Updates

- Find updates on recent Releases with links to key documentation
- See what is happening in the current Release
- See what is being planned for upcoming Releases

## Submit Ideas and Feedback

- Provide feedback on an existing or upcoming feature
- Submit new feature ideas and suggestions
